Public transport/Bus tour to The High Tec Ones: Blue Planet Ecosystems and Jongerius Ecoduna microalgae production

Date: Monday, September 18th
Time: 10h00 to 16h45.
Cost: €47 per person, including bus, lunch box and a visit to the farms

Maximum number of persons: 30

Book early to ensure your place! [https://www.aquaeas.org/Registration/Submit/AE2023](https://www.aquaeas.org/Registration/Submit/AE2023)

The excursion departs from the Messe Wien Exhibition and Conference Centre at 10h00. With the bus you go to Blue Planet Ecosystems, located in the south of Vienna.

Blue Planet Ecosystems develops vertically integrated, solar-powered aquaculture systems for sustainable fish production. You get to see how they build their systems and how to control them. Additionally, there will be given a presentation on how AI and IoT will help to revolutionize aquaculture!

At 12h00 the bus will take you from Blue Planet Ecosystems to Jongerius Ecoduna, located in Bruck an der Leitha, east of Vienna.

At Jongerius Ecoduna you will enjoy a 1 ha sized microalgae plant with a unique technology for the industrial production of microalgae like Chlorella and cyanobacteria Spirulina. The company developed during the last 15 years a unique system to produce microalgae focused on pureness and sustainability. You will get an exclusive insight view about their production, their products and how they started growing microalgae.

The bus will then take you back to the Messe Wien Exhibition and Conference Center.

Lunch: a lunchbox is prepared with ham roll, cake, Manner wafers and orange juice
